07 · Contact form conversation

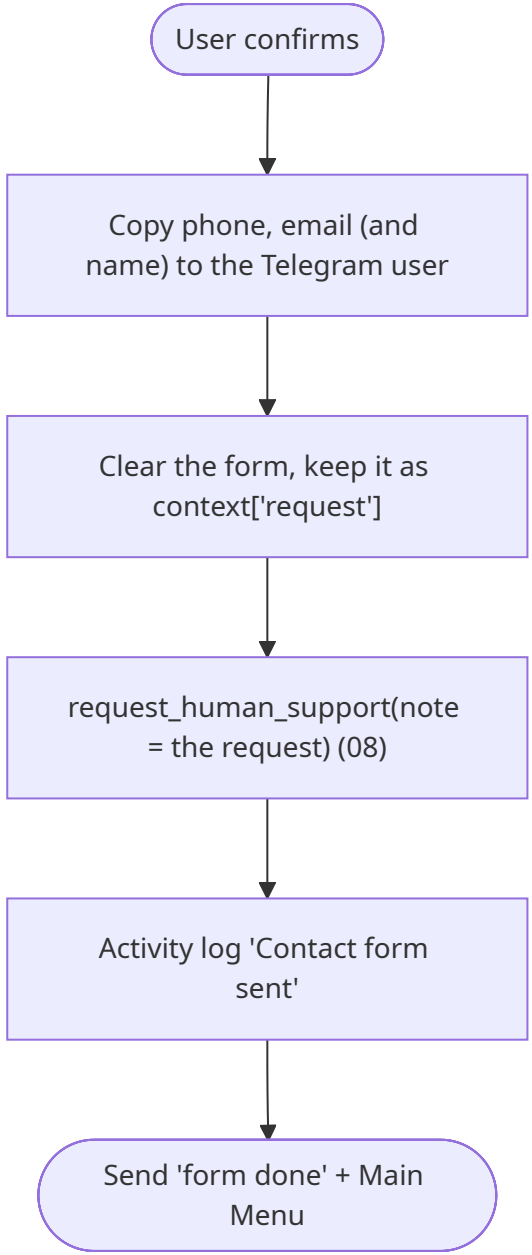

Name → Phone → Email → Request → Confirmation

Code: `app/services/forms.py`, `app/services/validators.py`, `app/bot/handlers.py` (`_start_form`, `on_form_confirm`), `app/services/scheduler.py` (reminder)

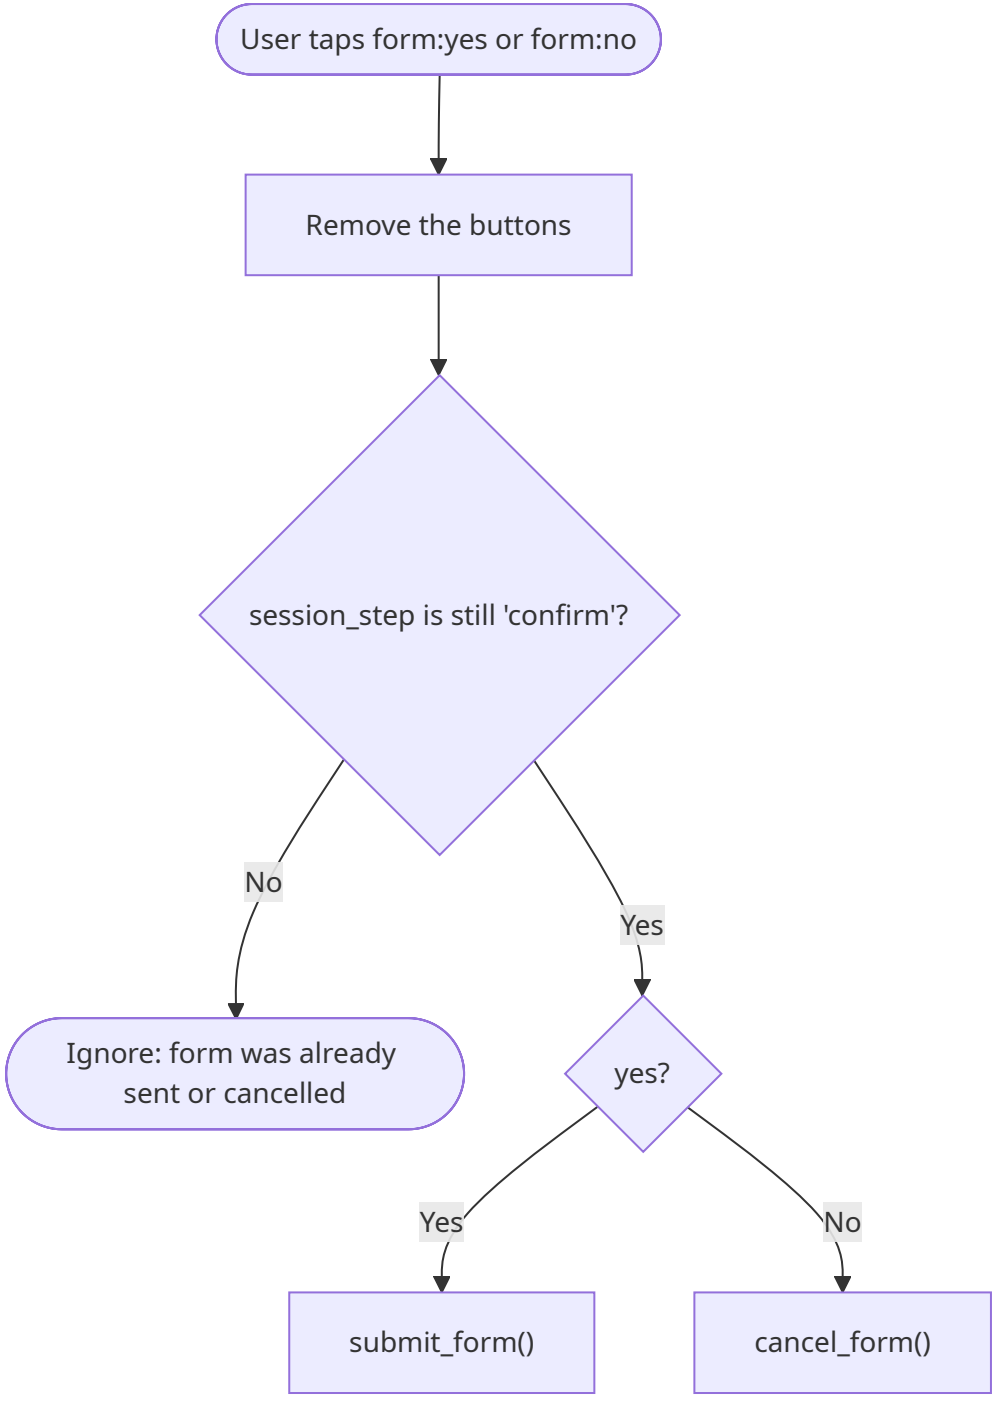

Started by the Main Menu button "Contact Form" (04) or by the `contact_request` intent (06). The step is stored in `Conversation.session_step` and the answers in `Conversation.context["form"]`, so a half-filled form survives a bot restart.

Submit

User confirms
Copy phone, email (and name) to the Telegram user
Clear the form, keep it as context['request']
request_human_support(note = the request) (08)
Activity log 'Contact form sent'
Send 'form done' + Main Menu

Old confirmation buttons

Reminder for an unfinished form
